NAME INC
March - 2014

- The TEXTAR EPAD stands for “environmentally friendly pad”. The Epad generates less brake dust which reduces the frequency of wheel cleaning therefore conserving water. An added benefit is less pollutants in the environment.
- The TEXTAR EPAD guarantees maximum safety combined with an optimal comfort level, low noise, low dust and is equal to original equipment safety standards. Even under extreme conditions i.e. The German AMS (AUTO MOTOR SPORT MAGAZINE) test performed 10 back-to-back deceleration from 100 Km/h (60 miles) to 0 Km/h with 100 % brake force applied the TEXTAR EPAD performed at OEM levels without fading.
- All TEXTAR EPADS are R90 (EUROPEAN SAFETY STANDARD) certified!
- The EPAD development spanned over 3 years, with 6000 dynamometer testing hours and 300,000 kilometers (185000 miles) driven!
- The EPAD does not contain aggressive steel wool therefore reducing disc wear and consequently dust. The brake pad compound ingredients create a unique layer between brake pad and disc which offers wear protection and optimal friction values for safety and a longer pad and disc life. The TEXTAR Epad is already being supplied to various OE manufacturers.
